

17 December 1956

MEMORANDUM FOR: Chief, AG4/SC
SUBJECT : Illegibility of CS Reports

1. The attached CS reports are forwarded as examples of documents which cannot be processed into OGI's film storage and copy system. As a consequence, OGI Library must store the hard-copy at substantially higher cost and put requesters to some inconvenience to come in person to K Building to obtain the information concerned.
2. Can replacements suitable for filming be obtained for illegible CS documents? If so, CIA Library can supply an exact list of the documents concerned.
3. In the CS-X series, where illegibility is generally characteristic of our receipts, we believe that the problem lies in the reproduction system employed and inquire whether a change to an entirely different system of reproduction is not feasible.
